

Single/Twin Exhaust Extractor

Single Exhaust Extractor is a reliable and functional solution for all types of stationary vehicles. Available with balancer or a cord for manual hose suspension. The balancer automatically raises the hose and nozzle after disconnection, and keeps them lifted at all times. Models for high temperature application are available.

Twin Exhaust Extractor removes exhaust fumes from two vehicles at the same time, or from vehicles with twin exhaust pipes.

- Easy handling of exhaust hose
- Takes up very little space
- Low cost solution
- Easy to install
- Prepared for fan mounting on bracket
